

HITO Eau de Parfum £146
www.waitbotanicamente.com

This perfume lasts on your skin for ages, it smells divine and is one of my favourites as we come into Autumn. The glass, packaging and wooden lid are all 100% sustainable. Composed of natural essential oils extracted from plants through steam distillation and with a certified supply chain.

*HITO evaporates and transcends
the common heart of pure human spirit experience.*

*The perfume is the expression of the soul, it is a melody
composed of aromatic notes, blended together harmoniously
in order to elevate the spirit and free the mind
it promotes a meditative state and raises the vital tone.*
